Shravani Karry

PRODUCT MANAGER

shravani.kvnks@gmail.com | +91 99624 37235 | **linkedin.com/in/shrash** | **shravanikarry.com** | Bengaluru, India

I build products that make people's lives simpler and genuinely better, and I take each one from zero to a hundred. I start with the person using it: what they're trying to do, and what gets in the way. That decides what gets built first. Instinct, earned over four years of shipping, picks the first bet. Then the data proves it or kills it, and I double down on what holds up. AI writes my first draft. The judgement and the finish are mine.

EXPERIENCE

Ultrahuman — Product Manager

APR 2025 – PRESENT · BENGALURU

Every line below has a case study at shravanikarry.com

- **Ring PRO** · **Over half of all ring orders since the Feb 2026 launch, order value 25% above Ring AIR.** A new flagship with no pre-order path, no order tracking and no launch comms.
- **HealthEx, medical records** · **~3,500 US activations in the first month, 20% fully connected.** The ring read sleep, glucose and blood, but nothing medical, and nothing diagnosed ever gets measured again.
- **HSA/FSA on Blood Vision** · **20% of US Blood Vision revenue since Jul 2025.** $174B of pre-tax health money in the US and nothing we sold was certified eligible.
- **Web Campaign Engine** · **5,393 orders across 88 countries in run one; 300+ campaigns since.** Every website campaign needed a PM and two developers.
- **Trade-in** · **13% of web ring orders since the relaunch, 25% in launch month.** Version one collected old rings by courier and the ops cost ate the revenue.
- **BetterHelp** · **~590 paid therapy sign-ups, ~$120K in commission.** The largest US therapy platform wanted more than a discount link; our members had nothing on mental health.
- **2-hour and 4-hour delivery** · **45% of India web ring orders since launch.** Older ring stock in six Indian cities to clear before the new ring; the UAE version built in a day for a creator launch.
- **Ultrahuman Home** · **Monthly orders 4x after the page rebuild.** The landing page did not explain a room monitor and the pricing page hid the membership.
- **Photon** · **55% of the first batch sold.** A red-light device under strict medical claims rules, sold to a base that had only bought wearables.
- **Verified-identity discounts** · **5% of US ring orders, order value 7% above the rest.** Every competitor had a heroes discount and no verification vendor would work with us, so version one was manual.
- **Native-currency checkout** · **Daily purchases up 100% in Canada and Australia.** Eleven markets were being asked to pay in US dollars.
- **Apple Pay express checkout** · **29% of UK/EU and 19% of US web checkout revenue on Apple Pay.** One-tap checkout on both rings across eight markets, scoped by wallet share.
- **Cash on delivery** · **15% of India ring orders.** Card-shy markets; extended to try-on kits in India, UAE, Germany, Saudi Arabia and Mexico.
- **Referral program rebuild** · **3% of ring orders over 13 months.** A flat 10% off and one reward at five referrals; nobody felt progress before the fifth.
- **Best Buy in-store pickup** · **38% of Best Buy stores ready for day one. In build.** Ring PRO stock on Best Buy shelves to sell through by routing our own web orders to the store next door.
- **Battery and firmware** · **25% replacement rate on rings running above 40°C.** Overheating chargers were turning into whole-ring returns and refunds.
- **Dead-on-arrival rings, Canada** · **67% of retail orders had never connected.** Buyers returned rings to the store instead of ever contacting support.
- **Brushed Rose Gold Ring AIR** · **1% of Ring AIR web orders in the first four months, ~800 paid switches.** A new colour for members who had already ordered, without reshipping.
- **Walmart gift sizing kit** · **5,000 serialised kits in store.** A ring sold off a shelf to someone whose size nobody knows.
- **Birthday discounts** · **~150 orders since Aug 2025.** The one day a member expects a brand to notice, and we did nothing.
- **Gifting** · **In build.** Companies wanted bulk rings on invoice and individuals wanted to send one; the store could do neither.

Ultrahuman — Program Manager

MAY 2024 – APR 2025 · BENGALURU

- **HSA/FSA payments** · **$5.9M across 14,000 orders since Aug 2024, processing fee 8.5% to 3.5%.** Pre-tax checkout was on the most expensive processor and only covered the ring.
- **External support hiring** · **~40 agency agents across three vendors in three months.** Ticket volume outgrew the in-house team; SLAs, interviews, playbooks and a quality scoreboard.
- **Quality management system** · **$23K renewal fee negotiated to zero.** ISO 13485 and FDA 21 CFR 820 implementation across engineering, ops and legal.
- **Global transit insurance** · **Every shipment lane covered, live 9 Jan 2025.** Shipments had no cover; built the value dataset for underwriting and placed the policy.

Ultrahuman — Marketing Manager

APR 2022 – FEB 2024 · BENGALURU

- **Campaigns end to end** · **Black Friday 2024: $7.7M and 20,477 rings across all channels; Diwali 2024 run rate 75% above base.** Owned construct, web and app changes, testing and close-out across India, UAE, Europe, UK and US.
- **Lifecycle and content** · **1,500 articles migrated to a rebuilt blog; Amazon brand stores in India and UAE.** Email, push and WhatsApp sequenced per market and time zone.

Gemraj Technologies Ltd — Digital Marketing Executive

FEB 2021 – APR 2022 · ESSEX, UK

- **SEO, email and ads** · **Organic traffic +60%, bounce rate –50%, email open rate +15%.** Owned SEO, monthly content, email and Google, LinkedIn and Facebook ads; mentored two trainees.
