Shravani Karry

PRODUCT MANAGER · HEALTH TECH

shravani.kvnks@gmail.com | +91 99624 37235 | LinkedIn | Bengaluru, India

Product Manager who likes to own a product and dig into the problems at every stage of its lifecycle, from first launch to renewal. I start each one in the data, because the answer is usually already there for whoever digs deep enough and is willing to test a few solutions before the right one. AI gives me the first draft. The judgement and the finish are mine.

EXPERIENCE

Ultrahuman — Product Manager

APR 2025 – PRESENT · BENGALURU

PRODUCTS SHIPPED

- **Partner products.**
  - **HEALTHEX** (medical records): ~3,500 US activations since the 30 Sep 2026 launch, ~20% fully connected, ~10% in the first week. Members link their records from any US provider; the app reads diagnoses, medications and lab results against nightly ring data and prepares a summary for their next doctor visit. I ran partner diligence and the contract, set the five data-storage and deletion rules with legal, wrote the spec and launched it.
  - **BetterHelp** (therapy): ~$120K commission from ~590 paid sign-ups, Feb to Oct 2026. In-app mental-health feature, a cross-sell journey to therapy, per-member attribution links. Extended to Ring PRO sold on BetterHelp's therapist platform.
  - **Clue Plus** (cycle-tracking subscription): under $1K from the first run. Store listing, voucher flow, regional pricing. Used the result to reset the relaunch around in-app placement and revenue share.
  - **Luminary** (women's-health supplements): under $1K since Aug 2026. Five products on the US store as reseller, FDA-claims compliance, storefront code shipped by me.
  - **Walmart** (US retail): an in-store gift sizing kit sold at Walmart and redeemed on our site. Purchase-code and serial pairing scanned at the till, the claims page with per-state copy, order and fulfilment integrations with the gift-card network and the distributor, 5,000 serialised kits, a paid rose-gold upgrade on claim with split refunds. The purchase-code API pattern now serves every retail distributor.
- **New capabilities.**
  - **Ring PRO** (Feb 2026): ~$7M through October; over half of all ring orders since launch, at an order value ~25% above Ring AIR. Pre-order page in 10 currencies with a $349-to-$449 volume ladder and retroactive refunds. Order-tracking page with batch, ETA and trade-in status. Waitlist reminders, pre-order email journey, support channel, FAQ. Ring AIR 2 launch now in progress on the same setup.
  - **Photon**, red-light therapy device (May 2026): ~55% of the first batch sold. Landing page and positioning, pricing page with per-market pricing and offers, legal-cleared copy. Order feed, ETAs and returns handled with support.
  - **Web Campaign Engine**: $2.2M from 5,393 orders across 88 countries in its first run, Black Friday 2025. Website campaigns set up on the internal admin tool by any business team, no engineering. Discounts by country, homepage banners, scheduled go-live.
  - **Canada retail partners**: two-year warranty override on Best Buy, Costco and Staples rings, and the membership card flow for retail buyers.
  - **Best Buy in-store pickup** (US, Oct 2026): Ring PRO bought on ultrahuman.com and collected the same day from a Best Buy shelf. A "pick up at Best Buy" option on the pricing page and homepage with a store picker fed by live shelf stock (118 of 311 stores, 14 of 32 sizes on day one); a checkout with no shipping address; 40 pickup variants added to all 16,000 live discount codes; pickup-ready emails with store, date and time; the order-tracking page showing the store address and map; cancellation and refund rules agreed with Best Buy. The same flow goes live in the app next.
  - **Ultrahuman Home**, air and sleep-environment monitor (web launch Jun 2024, pages rebuilt Nov 2025): ~$1M across all channels. Pre-order launch with a three-day early-bird price and a launch checklist across store setup, order system, QA and banners. New landing and pricing pages in Nov 2025 with daily ambient-score cards, a room-by-room section, certifications and membership pricing: monthly orders ~4x the five months before.
  - **Brushed Rose Gold Ring AIR** (Jun 2025 to Sep 2026): ~800 paid colour switches, ~$45K add-on revenue, about 1% of Ring AIR web orders in the first four months. Colour selector on the pricing page, a paid switch-to-rose-gold checkout for existing orders, upgrade links for support in the order tool, SKU change and size submission after payment, refunds for downgrades, discounts extended to the variant, order alerts and a revenue dashboard, and the Walmart claims-page upgrade.
- **Referral program rebuild.** ~3% of ring orders, ~$550K over 13 months. Five-step reward ladder for 580K ring owners, replacing a single reward. Migration rules, fraud checks, six-stage funnel.
- **Gift Ultrahuman.** Festive-season gifting flow, live for Diwali 2026, with Stripe invoicing by card, ACH or wire and nothing released until funds settle.
  - **Gift sizing kits**, for corporate bundles: prepaid try-on kits, each carrying a full-value ring code, priced in volume bands from five kits upward.
  - **Gift vouchers**: sold at face value, redeemable across the store, bonus value loaded for bulk buyers.
  - **Gift ring cards**: a ring bought for someone else, who picks their own size and colour on redemption.

GROWTH LEVERS

- **Speedy delivery.** Fast delivery slots on the India and UAE ring stores, chosen by 45% of India web ring orders since launch (479 of 1,075).
  - **2-hour delivery, India.** pincode check on the pricing page; two-hour slots from kiosks in Bengaluru, Delhi NCR, Mumbai and Pune between 11 AM and 7 PM, next-day after that; the ring ships the same day a size is shared from a sizing kit; live ETA on the order-tracking page, WhatsApp and email updates synced from the warehouse system; FAQ and launch comms.
  - **4-hour delivery, UAE.** Built in a day for a creator launch. Emirate picker on the pricing page; 4-hour slots in Dubai until 5 PM, same-day in Abu Dhabi and Sharjah until 1 PM, next-day elsewhere; cutoff and copy map by emirate; "Dispatched under 4 hours" on order tracking; WhatsApp with the rider link; a quick-delivery queue for ops and a fix to the fulfilment push that was holding orders for four hours.
- **Trade-in.** 13% of web ring orders since the February relaunch, 25% in launch month. Old-device credit at checkout, serial verification, instant refund. Carried into the Ring PRO pre-order and five more markets.
- **Verified-identity discounts.** ~5% of US ring orders since Jan 2025, at an order value ~7% above other US orders. 15% off for military, first responders, healthcare, athletes and students. Vendor-verified eligibility, landing page, support brief.
- **Birthday discounts.** ~150 orders and ~$40K since Aug 2025. Every ring member gets a personal birthday page, live for two weeks from their birthday, with 15% off the whole catalogue on any storefront. After two weeks the page stays up but the discount switches off, so the offer has a real deadline and no dead link.
- **Native-currency checkout in 11 currencies.** Daily purchases up ~100% in Canada and Australia in the first weeks. Added AUD, CAD, SAR, MXN, ZAR and JPY by moving each country onto the right store entity.
- **Apple Pay express checkout.** Apple Pay carries 29% of UK/EU and 19% of US web checkout revenue. One-tap checkout on both rings across eight markets, scoped by wallet share.
- **Cash on delivery.** ~15% of India ring orders pay by COD. COD on try-on kit orders in India, UAE, Germany, Saudi Arabia and Mexico, with the ops and finance changes behind it.
- **HSA/FSA checkout on Blood Vision.** ~20% of US Blood Vision revenue, ~$145K since Jul 2025. A pre-tax checkout built alongside the card flow: the test split into two line items for tax reporting, the same discounts on both rails, and a renewal audit that found and repaired memberships billed but never extended. For the US holiday sale (15 Nov to 2 Jan), Ring PRO moves to a direct HSA/FSA checkout with a $100 coupon, HSA/FSA as the default payment option, and a dedicated OptumNow landing page.
- **In-app reminder and upsell journeys.** Membership reminders at day 3, 15 and 25 of the activation window. Glucose-monitor upsell triggered by recovery, sleep and BMI signals from the ring. BetterHelp post-activation and abandon-cart journeys.

- **In-app feature and discount campaigns.** 20% off annual plans across four paid features on three billing rails. Region-aware cohorts, then a clean switch-off after a price-display bug.

HARDWARE AND DEVICE EXPERIENCE

- **Battery and firmware problems.** Rings running above 40°C had a 25% replacement rate. Charger-swap program with in-app alerts instead of ring replacements. Rewrote the Ring PRO in-app setup after a protective film caused dead-on-arrival claims, and had a visible tape added at the factory.
- **Dead-on-arrival rings in Canada.** Two thirds of six weeks of retail orders had never connected a ring. Detection from setup events and ring-health scores, push within an hour, recovery flows to the first 214 members.

Ultrahuman — Program Manager

MAY 2024 – APR 2025 · BENGALURU

Company-wide programs with finance, legal, logistics and external partners.

- **HSA/FSA payments.** $5.9M across 14,000 orders since Aug 2024, about $295K saved in processing fees. Moved US pre-tax health spending checkout to a cheaper processor (fee 8.5% to 3.5%). Expanded eligible products from the ring to the whole catalogue.
- **External support hiring.** ~40 agency agents across three vendors in three months. Contract SLAs (59-second chat response, 150 to 200 tickets per agent a day), interviews, training playbooks, quality scoreboard.
- **Quality management system.** ~$23K renewal fee negotiated to zero. ISO 13485 and FDA 21 CFR 820 implementation with a regulatory consultancy: procedure sets across engineering, ops and legal, US factory in scope.
- **Global transit insurance.** Worldwide cover on every shipment lane from India to customers and warehouses, live 9 Jan 2025. Shipments had no cover before; built the shipment-value dataset for underwriting and placed the policy with Tata AIG.

Ultrahuman — Marketing Manager

APR 2022 – FEB 2024 · BENGALURU

- Leading product marketing campaigns monthly for a particular sub product and for other major offers like the Black Friday Sale and the Diwali Sale. This involves taking care of the campaign end to end. Communicating with the business team, product team to understand the construct, the different changes on the website and the app front. Testing all of the campaign links extensively to ensure seamless performance. Black Friday 2024 (20% off worldwide, 12 days): $7.7M across all channels and 20,477 rings, of which $4.26M came through web, app, comms and blog. Diwali 2024 (India, 7 days): $61.4K website revenue, 187 Ring AIR orders, a daily run rate ~75% above the non-campaign base. Diwali 2023 (India): 112 orders, $38.6K.
- The above also involves closing off a campaign seamlessly with extensive testing on numerous regions such as India, UAE, Europe, United Kingdom and USA.
- Leading and strategising communications during a campaign period and during off-campaign periods also. This involves any product updates or any offer updates.
- Driving creatives for marketplaces such as Amazon based in India and UAE. This involves curation of the brandstore, listing images, A+ content and suitable videos for the platform.
- Managed the entire migration of the blog site to a revamped one. This involves seamless migration of 1500 articles, managing an external web development agency and a set of writers to ensure a successful migration.
- Drafted a few PR articles for releases of products. Participated in conducting brand shoots.

Gemraj Technologies Ltd — Digital Marketing Executive

FEB 2021 – APR 2022 · ESSEX, ENGLAND, UNITED KINGDOM
